## Objective of this programme

People with disabilities face a large number of barriers-physical, economic and attitudinal. These barriers hinder them from living their life to the fullest. As a fellow human being, it is the responsibility of every citizen to be aware of the issues faced by the persons with disability. The objective of this training program is to create a cognizance among the various stakeholders to make the public realm more accessible and barrier free.

## Course Design

The one-day training programme includes the following sessions:

- Sensitisation Session
- Technical Session
- Hands-on Training
- Learning through Sharing
